Automatic case overwrappers

CDC200 series

- ▣ Gives CD or DVD or Blu-ray cases a folded, sealed finish
- ▣ Quality equal to that of larger machines
- ▣ Wrap up to 1200 cases per hour
- ▣ Large input hopper capacity
- ▣ Fully transportable

The Speedwrapper is a fully automatic table top unit designed to overwrap CD, DVD, PS3, X-Box and Blu-ray cases at high speed with little user intervention.

When your output needs the professional edge or simply requires those receiving discs to know they have not been tampered with, wrapping is the ultimate solution.

The Speedwrapper from Solstice Technologies is an easy to use, cost effective option. It provides a neat even case wrap with perfect seams time after time.

And now with the launch of the second generation Speedwrapper, you can extend the compatibility of the media case wrapper to additional formats simply adding optional media conversion kits.

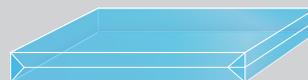

Easy to use

The Speedwrapper simply needs a power socket and roll of wrapping sheet to start wrapping cases, users place up to 25 cases in the input tray and press the start button. Once operating, the unit can wrap up to 1200 cases per hour.

Advanced technology

The Speedwrapper allow the user maximum control with sealing temperature being electronically controlled and adjustable. For safety, the unit will stop automatically in the unlikely event of a jam. This protects the user and allows them to efficiently proceed with wrapping discs easily.

Retail ready CDs and DVDs

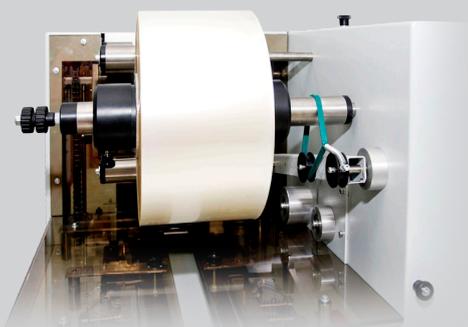

The speed wrap gives a wrapping finish equal to that of CDs and DVDs found in any retail outlet. Whilst shrink wrapping leaves cases with rough, unsightly seams, the speed wrap provides a neatly folded and sealed package.
